

## NSN Search

The following equipment matrix, both support equipment and airframe equipment, which 4MSigma, Cage Code 0BC31, manufactures is indexed sequentially by NSN. In addition, searches can be conducted on this PDF by NSN, NIIN, Part Number, Airframe, and Key Word Nomenclature. Using the Edit, Find function, simply type the search term in the "Find" field and, if present, it will be highlighted. The last column provides applications information for the airframe, ship, or vehicle used-on. Final rows listed include some non-stock-nr-listed items which may be clearly identified by Part Number. This matrix will be periodically updated to best serve end-users.
